SERVICES & SPECILIZATION

CIVIL

We are specialized in construction of site offices, buildings and housing development. We are capable in doing primary works, roadwork, trenching, excavation and at site. Construction of the building footings and beams. Civil works of the buildings and fabricated roof structures.

The company is constructing big site offices in Pengerang Johor for Refinery and Petrochemical Integrated Development (RAPID) project . RAPID is the largest PETRONAS project.

PIPING

We have experience handling piping fabrications and Installations. We provide the client with efficient project management team for planning and execution stages to cater customer big projects and shut downs. Our service include the QA/QC.

Our dedicated team have wealth of experience in plant constructions, shut downs, Turn Arouns and Rejuvenation projects.

PLANT TURN AROUND

We have experience handling shutdown, Installation, hook-up and commissioning works at PETRONAS Gas Processing Plant complex A and B, PETRONAS Penapisan (T) Sdn. Bhd. Ethylene / Polyethylene Malaysia Sdn Bhd., PETRONAS CUF Kerteh and Gebeng, Onshore Gas Terminal (OGT), and Titan Petrochemical plant in Pasir Gudang.

We also have experience in handling off-shore shutdown hook-up and commissioning job. During turn around we provide the client with efficient project scheduling to cater customer shutdown planning and, we handle offshore platform engineering services.

MECHANICAL, ELECTRICAL, INSTRUMENTATION, O2 SERVICES & FIBER OPTIC MAINTENANCE WORKS

We are capable to troubleshoot the faulty equipment and putting back on line as normal. We also provide experienced analyzer manpower to perform daily preventive maintenance work such as trouble shooting and repair work for all process measurement control systems and electrical device

MECHANICAL - ROTATING (ROTATING MACHINERY AND TURBO MACHINERY)

EOSB also have ability and facility for mechanical works. Most of our project is related with compressor, chiller, pump and turbine.

Our scope includes:

- Troubleshoot and resolve pumps and compressors operating problems.
- Conduct inspection of turbine control systems operation, turbine operating parameters, start-up and shutdown sequence.
- Conduct pumps and compressors inspections at the industry accepted inspection intervals, determine condition of internal parts, establish component life limits for safe turbine operation, make recommendations for scheduling of major gas generator/turbine overhauls and develop the scopes of work including references to vendor bulletins.
- Troubleshoot and resolve gas compressors and pumps operating problems, including vibration concerns, bearings, couplings, seals and specifying the correct equipment (metallurgy) for the service condition.
- Determine the current alignment values for rotating equipment and be able to conduct alignment checks in the field.

During project execution, we also ensure and verify all services and construction works to comply with project specification and fulfill client requirements.

ENERGY CONSULTANCY SERVICES

Our Energy Efficiency Consultancy Services offers detailed inspection, survey, measurement and analysis of energy flow of a built environment. Results and reports from the audit can determine the present practice, areas of high energy consumption, strengths and weaknesses, and recommendations to improve energy efficiency of a building or equipment without compromising the safety, efficiency and comfort of the workspace environment.

SUPPLY OF TECHNICAL LABOUR AND PROFESSIONAL MANPOWER
